Dear Ms. Whittington:

I am writing to tell you that I still support Engineering-Science's plan to cap and monitor the Buckingham County landfill. It has been proven that the landfill is not harming anyone as it is now and it makes no sense to me to mess with it. Doing so would be dangerous and costly - both of which are not necessary.

If the EPA listens to and values the opinions of the community they would see that we care about our community and we don't want to risk our lives and our jobs for something that isn't necessary. Please listen to us and use the Engineering-Science plan.

Sincerely,

*Stephanie Robinson*
